Art Unit 1644

DETAILED ACTION

1. Applicant's amendment, filed 10/15/01 (Paper No. 17), has been entered.
Claims 17-170 have been canceled. Claims 1-16 have been canceled previously.
Claims 171-286 have been added.

Upon reconsideration of the pending claims and applicant's comments of record, including the distinction between the claimed methods; the following species election is set forth.

The examiner appreciates that the claims have been limited to the elected $\alpha v\beta 3$ -specific antibody specificity.

2. This application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the targeted tumor is:
 - A) bladder tumor growth,
 - B) breast tumor growth,
 - C) lung tumor growth,
 - D) colon tumor growth,
 - E) angiofibroma,
 - F) retrolental fibroplasia,
 - G) hemangioma, or
 - H) Kaposi's sarcoma.

These species are distinct because the pathological conditions differ in etiologies and therapeutic endpoints.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

3. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Serial No. 09/081522
Art Unit 1644

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gambel whose telephone number is (703) 308-3997. The examiner can normally be reached Monday through Thursday from 7:30 am to 6:00 pm. A message may be left on the examiner's voice mail service.
